

# AS YOUR NEEDS GROW, SO DO OUR CAPABILITIES

When you acquire an R8100 or R8000 communications analyzer,  
you get more than a test instrument.

You get a tool that grows with your needs and with the industry trends. We are pleased to introduce AutoTune™ support for two important radio lines: Harris XG-100 Mobiles and BK Technologies KNG Series Portables.

We'll be adding even more AutoTune™ options in the months ahead, expanding our support for these and other leading radio manufacturers. As the only company dedicated exclusively to supporting the LMR test market, we are committed to providing solutions for every important LMR test need. Contact your local representative for a demonstration of the industry leaders: The R8100 and R8000 from Freedom Communication Technologies.

XG-100 and Harris are trademarks of Harris Corporation  
KNG and BK Technologies are trademarks of BK Technologies
